

Bi-fold Door Provides Security for Law Library

Well Bilt Industries, Williston, Fla., provided a bi-fold door for the **Law Library and George A. Smathers Libraries at the University of Florida, Gainesville**. When in the open position, the door allows access to the elevators and escalators. When in the closed and locked position, the door seals off the elevator/escalator area and offers no access. The 20-foot 8 1/2-inch by 11-foot 1-inch (6.3- by 3.4-m) bi-fold door features an auto-lock system, photo eye, remote control and exterior wood paneling to match interior library paneling. Florida Overhead Door and Specialties, Gainesville, installed the doors.
